

Australian Antarctic Science Season 2008 - 2009

Marine Science

Continuous plankton recorder
Ocean water properties
Sea ice thickness
Primary production

Adélie penguin monitoring
Cosray infrastructure upgrade
Atmospheric research

Mawson

Davis

Marine microbial communities
Atmospheric research
Glacial ecosystems
Vestfold Hills - geology and lake microbes
Geoscience
Plasma waves
Automatic weather station

Dome Argus

AGAP

Aerial whale survey

Casey

Atmospheric electric circuit → **Dome Circe**

Law Dome ice cores

Remediation (petroleum/heavy metals)
Sea-ice primary production
Geoscience
Seal foraging patterns
Food web
Genetic diversity of plants
ICECAP

Macquarie Island

Pest eradication
Fur seals
Vegetation
Geoscience
Tide gauge
Albatrosses and petrels

See over for project information
